Graph it!

Tally the number of different coloured cars you see on your way home from school for three days.

Make a graph using your data. Once you have made your graph, you may like to answer the following questions?
1. Which colour car did you see most of?
2. Which colour car did you see least of?
3. How many blue and red cars altogether?

Share day is Friday. Don't forget to bring in your graph to show everyone.
