

## YEAR 2 OPT IN

<b>E1</b>	<b>E2</b>	<b>E3</b>
<b>M1</b>	<b>M2</b>	<b>M3</b>
<b>S1</b>	<b>S2</b>	<b>S3</b>

# S1

## Have fun with this little experiment!

1. Put on a woollen or a nylon jumper.
2. Blow up the balloon and tie the end so that the air does not escape. You may need to get mum or dad's help to do this.
2. Take the balloon and rub it backwards and forwards against your hair about ten times.
3. Now hold the balloon against your jumper for a minute.
4. Let go of the balloon. What happens? Does it stick?

**What happens? Take a photo!**

**Share the results with your class!**
