Which shoes grip best?

In this section, you will use your knowledge of force, motion and of scientific investigation to solve a problem about friction.

6. Think about how science could help these children decide which shoes are best.

- Circle one idea in the comic strip that you agree or disagree with.
- Use scientific ideas to explain why you think it is right or wrong.

I agree that ..............................................................................................................................................................................................

don't agree (circle one)

because ........................................................................................................................................................................................................
........................................................................................................................................................................................................
........................................................................................................................................................................................................
