FLOAT OR SINK?

You need:

- egg
- 2 glasses/cups
- Water
- Salt

Fill a glass with tap water. Place a raw egg in the water. Make a prediction about what will happen. Draw a picture of what happens.

In a different glass, add 3 teaspoons of salt to a glass of water. Make a prediction about what will happen. Draw a picture of what happens.

Does the salt in the water make a difference? Why do you think this is so?

Bring in to share with the class on Friday!
