

# SWIMMING POOL

- This generic template is provided to support schools in implementing the [Managing risks in school curriculum activities procedure](#).
- The [CARA planner](#) must be used in conjunction with this guideline for the specific school context, considering additional risks, hazards and controls and including environmental, facility, equipment and student considerations.
- Depending on the scope of this activity, other risk assessments may be required when planning. Curriculum activities encompassing more than one [CARA guideline](#) must comply with the requirements of all CARA guidelines appropriate to the activity.
- For activities conducted at a non-Department of Education venue, and/or when engaging external expertise, request written risk assessment advice and attach it to this CARA record.
- For activities conducted off-site, schools must comply with the [School excursions and international school study tours procedure](#).
- For activities conducted as part of representative school sport programs, schools should consult with [Queensland School Sport](#).

## Activity scope

Describe the details of the curriculum activity as it applies to the school's [three levels of planning](#).  
 Maranatha Recreation Camp offers the use of the camp pool to school groups.  
 Students have access to the pool during free time each afternoon

Inherent risk level <sup>1</sup>		CONSEQUENCE if an incident were to occur			
		MINOR Injury requiring first aid treatment	MODERATE Injury requiring medical treatment	MAJOR Injury requiring specialist medical treatment or hospitalisation	CRITICAL Injury resulting in loss of life or permanent disability
LIKELIHOOD of an incident occurring without control measures in place	<b>ALMOST CERTAIN</b> Expected to occur in most circumstances	Medium	High	Extreme	Extreme
	<b>LIKELY</b> Will probably occur in most circumstances	Medium	High	High	Extreme
	<b>POSSIBLE</b> Might occur occasionally	Medium	High	High	High
	<b>UNLIKELY</b> Could happen at some time	Low	Medium	Medium	High
	<b>RARE</b> May only occur in exceptional circumstances	Low	Low	Low	Medium

<b>Inherent Risk level</b>	Low risk: <input checked="" type="checkbox"/>	Medium risk: <input type="checkbox"/>	High risk: <input checked="" type="checkbox"/>	Extreme risk: <input type="checkbox"/>
----------------------------	---	---------------------------------------	--	--

<sup>1</sup> The *inherent risk level* is determined before any control measures are put in place. Refer to the [CARA planner](#).

## Activity requirements

- *Maranatha Recreation Camp does not provide a lifeguard or supervisor to supervise students in the pool outside of designated Maranatha Recreation Camp pool activities.*
- *Teachers are responsible for controlling all behavioural issues*
- *Constant active supervision is required for students.*
- *Schools are responsible for supplying all first aid items required during their stay*

### Students

- Schools must consider age, maturity and skill level of students when planning curriculum activities. Adjustments are required for [students with disability](#) to support access and participation in the curriculum. Consult with the parents/carers of students with disability, or when appropriate the student, to ensure risks related to their child's participation in the activity are identified and managed.
- Schools must consult current student medical information and/or health plans in accordance with the [Managing students' health support needs at school](#) procedure. Record information about any student condition (e.g. physical or medical) that may inhibit safe engagement in the activity and include specific support measures within emergency procedures.
- The school's [sun safety strategy](#) must be followed if participating outside.
- Follow the [Managing excessive heat in schools](#) guidelines on hot days.

### Emergency and first-aid

- Emergency plans and injury management procedures must be established for foreseeable incidents (e.g. separation from group, fire/evacuation).
- Adult supervisors must have:
  - emergency contact details of all participants
  - a medical alert list and a process for administering student medication;
  - communication equipment suitable to conditions (e.g. mobile phone) and a process for obtaining external assistance and/or receiving emergency advice;
  - an appointed emergency contact (e.g. the Principal).
- Safety procedures must be determined for the location (e.g. roll marking, process to rapidly communicate emergency advice to adult supervisors of impending severe events) and are to be informed by available safety information (e.g. venue/expert advice, manufacturer's instructions, product labels, vendor SDS and SOP) .
- Access is required to [First aid equipment](#) and consumables suitable for foreseeable incidents.
- For participants with known allergies, schools must comply with the [Supporting students with asthma and/or at risk of anaphylaxis at school procedure](#) and the school's [Anaphylaxis Risk Management Plan](#), including an adult supervisor of the activity with [anaphylaxis training](#).
- An adult with current emergency qualifications for foreseeable incidents is required to be quickly accessible to the activity area.

### Induction and instruction

- Induction is required for all adult supervisors on emergency procedures, safety procedures and correct techniques. If the activity is conducted at an off-site facility, induction is to be informed by advice provided in consultation with expertise at the venue.
- Instruction is required for students on safety procedures and correct techniques (e.g. preventing injury).

### Consent

- [Parent consent](#) is required for all activities conducted off-site. For activities conducted on-site, [parent consent](#) is required for extreme risk activities and strongly recommended for high risk activities conducted on-site.

*Add additional Activity requirement details*

- Students are not permitted to enter the pool area without teacher supervision
- No running in the pool area
- No bombies
- No rough play
- No shoulder rides
- Students are required to listen to safety briefings
- Students are to follow the directions from teachers at all times

## Supervision

Principals make final supervision decisions for the activity. Sufficient adult supervision must be provided to manage the activity safely (including emergency situations).

- For activities with students with a medical condition or disability that may impact on safety during the activity, consultation with parents is required prior to allocating supervision to determine the impact of students' disability on safety during the activity.
- The number of adult supervisors required to fulfil emergency and supervision roles must consider the nature of the activity, students' ages, abilities and specialised learning, access and/or health needs.
- Before the activity, all adult supervisors:
  - must be familiar with the contents of the CARA record
  - must assess [weather conditions](#), and obtain accurate information on [tides](#), depths, currents and other expected water conditions (if applicable) prior to undertaking the activity, inspecting the intended location in order to identify variable risks, hazards and potential dangers.
- During the activity, all adult supervisors:
  - **must** be readily identifiable
  - **must** closely monitor students with health support needs
  - **must** comply with control measures from the CARA record and adapt as hazards arise
  - **must** suspend the activity if the conditions become unfavourable (e.g. poor visibility, extreme temperatures, thunderstorms).

*Add additional supervision details*

- Pool area must be kept clear of all non-essential items
- Registered teacher to be in control and actively supervise students in the pool at all times
- No students are allowed in the pool area without teacher supervision
- Registered teacher to outline rules for the pool area: no running, diving, bombies, rough play, shoulder rides
- All injuries must be reported to Maranatha Recreation Camp staff ASAP
- Pool gate is to be kept closed at all times
- Ensure students are wearing appropriate swim wear
- Assess weather conditions before and during pool time (e.g. temperature, storms)
- Check and assess surrounds for loose items, debris, and hazards
- Monitor swimming abilities of students

## Supervisor qualification

Principals make final decisions in determining supervisor capability (competence, relevance and currency) and are responsible for encouraging and enabling school-based activity supervisors to raise their qualifications to improve safety standards.

- All adult supervisors must comply with the [Working with children authority procedure](#) and be able to identify, and respond to, risks or hazards that may emerge during the activity.
- A registered teacher **must** be appointed to maintain overall responsibility for the activity.
- At least one adult supervisor is required to be:

### Low risk level

- A registered teacher with knowledge of the activity and its potential hazards  
or
- An adult supervisor, working under the direct supervision of a registered teacher, with competence (knowledge and skills) in the activity.

### Medium risk level

- A registered teacher with competence (knowledge and skills) in teaching the activity  
or
- An adult supervisor, working under the direct supervision of a registered teacher, with qualifications in the activity or similar.

### High risk level

- A registered teacher with qualifications in the activity (or equivalent demonstrated capability) and with competence (knowledge and skills) in teaching the activity  
or
- An adult supervisor, working under the direct supervision of a registered teacher, with qualification or current accreditation in the activity.

### Extreme risk level

- A registered teacher with qualifications or current accreditation in the activity  
or
- An adult supervisor, working under the direct supervision of a registered teacher, with a high level qualification or accreditation in the activity.

*Add additional supervisor qualification details*

- 2 QCT registered teachers
- 1 certified first aid provider

## Facilities and equipment

The qualified adult supervisor of the activity, in consultation with the principal, determines the requirements for facilities and equipment appropriate to the local context.

- Consult [Chemicals in curriculum activities](#) for support in assessing the risks of chemicals used with/by students in curriculum activities.
  - If a CARA record is required in OneSchool, a summary of chemicals, plant, equipment and/or materials used in the activity must be provided by entering directly onto the CARA record in OneSchool or by attaching a summary. Sample templates are provided on [Chemicals in curriculum activities](#) and [Plant, equipment and materials in curriculum activities](#).
  - Location must be suitable for the activity being undertaken, including sufficient space, adequate lighting and ventilation to ensure safe participation and that safety rules and procedures can be followed. This may be in a specialised facility (e.g. laboratory) or other suitable location (e.g. incursion, field trip). Undertake a reconnaissance of new or infrequently used locations to ascertain suitability.
  - Designated areas for the activity, spectators and vehicles are established (e.g. safety/exclusion zones considering buildings, pedestrians, members of the public, vehicles and other activities).
  - Participants must wear [Personal protective equipment](#) as relevant (e.g. enclosed footwear).
  - Equipment must be sized to match the ability and strength of students and used in accordance with the manufacturer's instructions.
  - If privately owned equipment is being used, Principal approval and owner consent/insurance details must be obtained prior to the activity.
- Registered teacher to have ready access to a first aid kit at all times.
  - No alcohol is allowed on site
  - No glassware is allowed in the pool area
  - Pool is not to be used during lightning and thunderstorms

## Hazards and control measures

Information on managing common hazards and risks in the school environment can be found at [Hazards and risks](#).

Add rows to the tables as necessary.

Considering environmental hazards	PlannRed control measures
Weather	<ul style="list-style-type: none"> <li>• Assess weather conditions before and during activity (e.g. temperature, storms etc.)</li> <li>• Pool is not to be used during lightning and thunderstorms</li> </ul>
Bodily fluids (blood, sweat, saliva, vomit)	<ul style="list-style-type: none"> <li>• All clothing, equipment and surfaces contaminated by should be treated as potentially infectious.</li> <li>• Have sufficient and suitable containment material available (bandages, vomit bags, sanitiser gel and wipes etc)</li> <li>• Ensure that personal items such as water bottles are not shared.</li> </ul>
Considering facilities and equipment hazards	Planned control measures
Pool and pool area	<ul style="list-style-type: none"> <li>• Pool area kept free from non-essential items</li> <li>• Pool gate to be kept shut at all times</li> </ul>
Considering students	Planned control measures
Drowning	<ul style="list-style-type: none"> <li>• Teacher is to be in control and actively supervise students in the pool at all times</li> <li>• 2 QCT registered teachers assigned to pool area</li> <li>• Pool gate to be closed at all times</li> <li>• Students to abide by rules and safety briefings</li> </ul>

Injury	<ul style="list-style-type: none"> <li>• First aid equipment readily available.</li> <li>• First aid trained staff member assigned to pool area</li> <li>• Supervising staff aware of first aid facilities and equipment.</li> </ul>
Student issues	<ul style="list-style-type: none"> <li>• All students listen and participate in safety briefing.</li> <li>• Regular head count of students in pool area</li> </ul>

<b>Monitoring and Review</b> <i>(to be completed during and/or after the activity.)</i>	<b>Yes</b>	<b>No</b>
Have additional hazards been identified?	<input type="checkbox"/>	<input type="checkbox"/>
Were the control measures effective?	<input type="checkbox"/>	<input type="checkbox"/>
Are further or different actions required?	<input type="checkbox"/>	<input type="checkbox"/>
