What information is important?

What strategy will you use to solve the problem?

# PLAN

A frog fell down a well which   
was 21 metres deep. He found it difficult to jump up the walls. He started his long jump up the well at 6 am. It took him 15 minutes to jump 3 metres because the walls were slippery. At the end of every 15 minute period he rested for 5 minutes which he sadly slipped back down one metre. At what time did he finally reach the top of the well?
